DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-33, drawn to phosphorus cyclic prodrug compounds of formula I, classified in class 558, subclass 73.
 - II. Claims 134-157, drawn to phosphorus cyclic prodrug compounds of formula VIII, classified in class 558, subclass 74.
2. Inventions of Group I and of Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination of the V and W variables to form an additional ring is a species within the genus of formula I. The subcombination has separate utility such as a prodrug, in it's own right, as set forth in Group II.

Art Unit:

Once an election of the core compound has been made between the compounds of formula I and formula VIII, applicant is required under 35 U.S.C. 121 to elect a single disclosed species for the drugs MH, even though this requirement is traversed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

The definition for the variable MH represents a multiplicity of patentably distinct species. Applicant is requested to select a single species selected from those set forth in claim 5 or claim 67 for the variable MH.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.

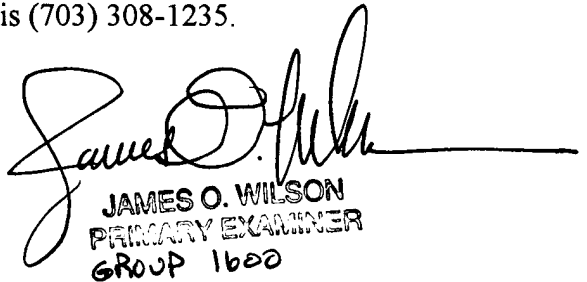

Art Unit:

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different core structure and classification and because the variability of the drug component imposes an undue burden upon the examiner in charge of this application.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James O. Wilson, Primary Examiner in Art Unit 1623 whose telephone number is (703) 308-4624. The examiner can normally be reached on Monday-Friday from 10:00am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Geist, can be reached on (703) 308-1701. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-4556.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
